

Vandal Mark Remover Aerosol

making your cleaning
Easier Safer Faster Cleaner

Vandal Mark Remover Aerosol

If you need to remove graffiti from porous surfaces then use the Vandal Mark Remover Aerosol. The aerosol clings to porous surfaces like concrete, stone and brick which allows you to brush it and use the towels for your final clean. On heavily textured surfaces, use a pressurised water hose to remove the residue. Directions for use: Shake well before use. Spray onto marks, wait 5-10 minutes then remove with clean cloth. If stubborn, repeat application. Allow to stand for 30-60 minutes. If accumulation is heavy, remove with spatula, then re-spray. If extreme stubbornness is encountered use a stiff bristle brush and work into the mark. Spray aerosol on again and wipe it off again. Always use clean brush or cloth.

Used on:

Baked enamel paints, Stainless steel, Cement or brick walls, Aluminum, Metal, Glass.

Used for:

Removes paint, lipstick, grease, ball point ink and crayon from a variety of surfaces.

Use with: Our Micro fibre mitt on smoother surfaces.
