Advantages of Techno-Clean Microfibre

★ *Silver antibacterial Healthcare Micro-fibre*

kills bacteria and germs.

1. Techno-clean is a micro-fibre product treated with silver (Ag) that is highly regarded for its antibacterial function.
2. Techno-clean Micro-fibre is proved to kill (Escherichia coli, Staphylococcus aureus, Salmonella etc.) and fungi within the fibre in several bio-lab tests.
3. Techno-clean Micro-fibre mop/cloth removes bacteria from surfaces to be cleaned and kills them in about 10 minutes.
4. Techno-clean Micro-fibre does not spread bacteria out while being cleaned.
5. Techno-clean Micro-fibre does not smell after use.
6. Techno-clean Micro-fibre is an environmentally friendly product because no disinfectants and sanitizers are required for the antibacterial action within the micro-fibre.
7. Techno cleans' antibacterial effect lasts until the micro-fibre is worn out.

- To get the maximum cleaning result it is important that your cloth folds twice easily (giving you 8 separate sides) allowing the maximum fibre contact per side with the surface
- Most inferior Micro-fibre loses its shape in the laundrying process making the cloth scrunch instead of folding flat
- Without being able to unfold the cloth easily to the next side we risk cross-contamination
- Competitors cloths usually lose their shape after a 100 washes
